

zarty iceberg

Tier 1 (done may need revisions) [The smiling mymy tier]

- **Ongezellig:**

Ongezellig is a spine tingling, A24 slowburn, pure Aryan kino Dutch webseries about three Schoppenboer sisters from the Netherlands named Maya, Coco and Mymy. It is beloved by all Zaryans worldwide. It is one episode divided into six deels with the first one being uploaded on July 20th, 2018 and the last being uploaded on October 9th, 2022.

- **Studio Massa:**

Studio Massa is the creator of Ongezellig. Studio massa started out his YouTube career by making YTPs and then animations. He later made this zemerlald webtoon called Ongezellig (now discontinued because he couldn't reach his goal of 6 traganzingdillion dutch dollars or something) . Massa is probably suicidal (or sick), and cancelled ongezellig out of spite for trannies who relate to Maya. He was also a brony in the past, traces of this can be seen in how the zellig characters kinda resemble MLP characters, especially their side profile.

- **Paypig art:**

Paypig art refers to a collection of drawings which Massa drew for his dutch patreon subscribers on a regular basis before he announced the show was dead. It consists of 114 unique files of distributed art, and a 'Muziek' archive containing 49 pieces of music made for the pilot. Not all of them are canon.

- **Official Ongezellig Comics:**

Along with Ongezellig, Massa made two comics. The first one is "Maya's Sweet 16" which tells the story of Maya's 16th birthday, in which she stayed alone in her room in the dark even doe Coco and Mymy wanted to celebrate, and then she cries about it. The second one is "Maya's conversation" where a boy sits next to Maya in a bus, and she wants to flirt with him but she fails horribly due to autism or something.

- **'cords**

Due to the popularity of the platform and the 'zellig community, the most degenerate and vile disgusting subhuman niggers flock to Discord. Some notable names are Roosland, NJS, Port. There are also glorified friend groups such as gemven, but info on these are scarce because they are gay circlejerks only 20 people know about. It is said that Discord is the coal that is killing the sharty and zarty, which is 100% true.

- **Blobfish plush**

The blobfish plush is a pink plush in Maya's room. She is seen hugging it, and possibly sees it as a friend.

- **ADD**

Maya claims to have ADD (Attention Deficit Disorder) and Mymy jokes about it saying that she has Autism Denial Disorder. Maya actually has ADHD (erm snopes fact check this please)

- **"4chan show"**

When offsiteers first see the show, they may comment on it as being a "4chan show" or "hazbin hotel for 4channers". While it is true that 'zellig first gained popularity on 4chan's /qa/, it has since been integrated into the soyteen culture instead. the few people left on 4chan that still care about ongezellig are the /co/ gooners and they will never be real zaryans.

- **Massadonië**

Massadonië is the official discord channel of Studio Massa, even doe massa doesn't care about it and it's instead ruled by his obsessed mod called Foenkie. The server is known for having very strict rules and not allowing any mention on soyjaks, soy culture, sharty, zarty or anything that is hecking tranxphobic.

- **r/ongezellig and r/zellig**

r/ongezellig is a reddit which was not originally related to 'zellig but was rebranded around 2024. It is trooncoded and the place where troons usually reside. In r/zellig's case, it has been partially colonized by Zaryans, albeit it is still rulecucked as usual with redits.

- **Roos Terra**

Roos Terra or R_terra, is the most obsessed and the most attention starved person in the zellig community. He has accounts on every platform and comments under every zellig content ever. He is a total attention addict. He is also the owner of one of the most popular zellig 'cords named Roosland. He is rumored to be a valid underaged latinx trans queen who larps as a girl when near trannies, but switches personalities when around chuds. He wants to get attention from all sides of zellig communities, which makes him a hypocrite.

- **Japsterdam, Drenthe**

Mymy claims to be from a place called Japsterdam that is supposedly in Drenthe.

Mymy of course made this up, because Drenthe is NOT a real place, obviously. Mymy lies about this because she doesn't want people to know she's actually Japanese.

- **Background characters**

There are many background characters that appear in the show. We know their names from the classroom photo.

Vera: Vera is the teacher in the show and she is a SISA middle-aged lady and also my wife. She wanted to be a singer when she was young but ended up as a history teacher instead, leading to her being depressed all the time.

Kiki: She is Mymy's "friend" and larps as a somali pirate. Not much is known about her personality, and the few ideas we have about it come from unused voicelines, the illustrations and such. Since she dresses like a pirate everywhere she goes, runs the school's pirate club and is also Mymy's friend it's safe to say that she might share the same overexaggerated larp personality as her.

Roos: She is Coco but with brown hair o algo.

Cato: She is Mymy but with blond hair o algo.

Adam: Finngolian truecel who will shoot up the school one day.

Axel: rich normalkike kakker

Yfke: lanky girl from Friesland who is high all the time.

Wiel: shitalaryan guy who dresses up like a greaser from the 60's. he is seen rizzing up Tryn.

Tryn: stereotypical dutch girl

Cleo: She was born in Willemstad, Curaçao, an island of the Leeward Antilles which is officially part of the Kingdom of the Netherlands, thus making her technically Dutch. She is Coco's slave, and has aspirations of becoming a professional musician. As a consequence of her being the only black NIGGER in the show, she has risen to significant popularity due to the Soysphere's obsession with race-play, the fact that she's female also exacerbates this.

Ilse: Jewish character inspired from Anne Frank

Koos: Kolyma's greatest soldier who is also high all the time.

Tier 2 (i think thats all) [Mymy looking to the right]

- What happened to Coco's parents?

We learn that Coco is an orphan. Massa's explanation for her parents' disappearance is them dying to a lightning strike. Most theorize that this is Massa backtracking on some lore, and the real reason for their death is theorized to be from the south african farm attacks.

- Identities of the voice actors

Maya's voice actor is Robin Barten, Coco's voice actor is Merel Does, Mymy's voice actor is Joyce Ter Stege and Vera's voice actor is Kayleigh Luyks. It is known that

Massa harassed girls at anime cons to get these voice actors. Mymy's voice actor is actually an asian-dutch girl so she's literally Mymy in real life or something. She has a youtube channel where she makes tranime covers. Not much is known of the other voice actors.

- **Kapitein Koek**

Kapitein Koek is a dutch mascot for a breakfast bar. Mymy is heavily obsessed with this character, having dreams about him and owning a body pillow of him. In the lore document Mymy is implied to be a furry, which could be because of Mymy watching oriental films at a young age (got epi'd award)

- **/qa/**

/qa/ was a legendary but short-lived board on 4cuck. it was originally made in January 2015 as a temporary board for question and answer events during moot departing from 4cuck and hiro arriving as the new owner. however, the board was not locked after these events ended, which resulted in it becoming a no-topic board, which evolved into it's own culture, consisting of the earliest soyjak posters. Ongezellig was first popularized on this board aswell, thanks to the legendary pioneers, namely the original zellig spammers. The board was permanently locked on November 3rd, 2021 during an event called The Great Soyset. After this, the soyteens entered a new era. It could be argued that ongezellig was destined to be an obscure animation in a random corner of the internet that no one cared about, had it not been popularized on /qa/, due to it being in a language that no one knows. So, in a way, /qa/ is the reason ongezellig is so popular today.

- **Sharty**

Sharty, also known as soyjak.party, is the famous soyjak imageboard first created by the legendary admin Soot, and acted as a spiritual successor of the /qa/ culture after /qa/ was closed on 4cuck. It is the place where many soyteens originated from. Many of the zaryans originated from the sharty aswell, as it is the site where many 'teens first discovered ongezellig through the zellig posters there. During sharty's early days, there were many ongezellig posters. Sharty has changed admins many times over the years. Some admins looked favorably to zellig posters as it was seen as /qa/ culture, others limited zellig posting. Under Froot's rule, zellig posting was strictly forbidden. Currently, sharty's userbase consists of obsessed nusoicacas and 12 year olds brainwashed by the frootist new world order into hating ongezellig.

- **soyzellig.party**

Soyzellig.party (also known as the 'Zarty in soy speak) is an imageboard created on the 27th of September of 2023 for soyteens that enjoy the Dutch tranime Ongezellig. Users of the site are called "Zaryans". Zoot created the 'zarty after experiencing years of Zaryan oppression under the totalitarian frootist regime on the

sharty. No porn is allowed in 'zarty. Frogposting is also not allowed due to raids in the past.

- **ZWABAG**

ZWABAG is an acronym for " 'zellig will always be a gem ". It is the catchphrase of all zaryans. It is derived from soyspeak, in which sentences are usually said as acronyms or words having an apostrophe.

- **Ongezellig Unofficially Continued**

OUC is a project by Quackzalver that planned to continue Ongezellig's story, as faithfully and accurately to Massa's style as possible. The plan was to make Ongezellig more appealing to studios. The scope of the project was to have 3 hours of animation within a year. What the fuck. Quack was really passionate about this, pulling several all-nighters researching the writing style of Massa and ((allegedly)) already having written enough to make several seasons. The project as of February 2025 has been dead silent for almost a year now, with zero communication from him or his contractually obligated unpaid workers. Who knows, maybe he died from sleep deprivation or quietly left it all behind, maybe we will see it in the future

- **Maya's parents**

Maya's parents, while not seen clearly in the show, are characters mentioned later in the comics. They are the biological parents of Maya and adoptive parents of Mymy and Coco. Her mother's name is Soei, and her father's name is Ravi. It is unknown why they decided to adopt girls from south africa and japan even doe they already had Maya. Some theorize this is because Soei hit menopause or Ravi's pecker stopped working or something.

- **Why Maya's bed creaks at night**

in deel 5 Mymy asks Maya why her bed creaks at night. We never get an answer. The leading theories are: jumping on the bed, stimming, humping or gooning (hyperjelqflicking xer jeetindochinkdutchpecker)

- **What's inside Coco's locket**

Coco always wears a locket, it seems it's very important for her. It is theorized that it contains pictures of her parents.

- **Cosplayers**

Several people have cosplayed as the Ongezellig characters. Mymy is the most cosplayed character by far. Maya is the second most popular, albeit all cosplayers of Maya unfortunately are trannies and faggots. At least we can say that the number of women who ever cosplayed as Maya is a whopping 88 times more than the salary of jannies.

- **Mymy's sister**

Mymy's sister was a planned character for the show. She is seen in a petje.af drawing holding a japanese "missing" poster with mymy on it, and later explained in lore documents by Massa. Her name was thought to be Mei or Mimi, but it was later revealed her name is actually Eiko. She comes from Japan to find and kidnap Mymy back to Japan. Massa explained, he had originally planned an episode where Mymy's sister crossdresses as a boy and infiltrates the school and Maya falls in love with her, which proves that Ongezellig has been a brimstone yuribait show all along and we Zaryans were unfortunately tricked into watching this yuribrim made by a brony faggot.

- **Mayamails**

Mayamail was a series of emails sent to the people that replied to Maya's email adress in the "Maya's Sweet 16" comic. Those email were essentially diary entries that Maya wrote on a weekly/monthly basis. The discovery of these mails was important to Zaryans as this was the last bit of hidden lore found after the cancellation of the show.

- **Leaked episode ideas**

After the cancellation of the show, Massa released some ideas he had for the show, had the show continued. He talked about these ideas in a discord call with his fans. he had an episode idea involving Maya getting a new cat. He also Talked about a band episode where Maya wanted to Join Coco's band because she really wants to, but she has no musical talent. There was also an episode about Mymy's sister which was the most fleshed out one. Massa was thinking of hiring an actual Japanese VA to voice Mymy's sister. He also had a "Anne Frank: The Musical" episode idea that involved Mymy somehow. More details about these episode ideas can be found on the kiwifarms thread about ongezellig.

- **Final lore document**

On september 2024 Massa released the final lore document for ongezellig on google docs. in this document we learned about the inspirations for the show and the characters, even more scrapped episode ideas, the names of maya's parents being Soei and Ravi, the real name of mymy being Meiko Tachibana, the name of mymy's sister being Eiko, descriptions of the background characters, early concepts, and more.

- **Birthdays of the zelligs**

Maya was born on the 21st of September

Coco on the 16th of December

And Mymy on the 3rd of March

The years are a bit of a mystery because Massa changed canon 1488 times, But during the deels they're all 16 years old.

- **Ghanshan**

Ghanshan is a popular xitter artist who makes zellig art, but adds xir brimstone self insert original characters into it, therefore making all xer art vantablack coal from the deepest parts of niggerhell. Xe also popularized drawing 'zellig OC coal, but those existed even before then.

- **February 6th (update 130)**

February 6th 2024 is the saddest day for all the Ongezellig fans. it is the day where Massa made his final update on his petje.af, announcing that Ongezellig has officially been terminated. This was a big catastrophe for the Zaryan race, as this event demoralized many Zaryans and made them quit ongezellig. Only real Zaryans stayed after this event.

- **BWC/BBC**

Racebaiting has been a part of /qa/ culture for a long time, consequently carrying over to the soysphere and the zelligsphere. Because Ongezellig is a show about girls, racebait jokes were inevitable. Many people say Mymy is built for BWC. Coco is usually the target of "built for BBC" allegations because she is a tall, blond white girl from South Africa, even doe she despises niggers in reality because niggers killed her parents.

- **Agugu**

Agugu is a schizophrenic hallucination birthed by a collective psychosis on the zarty. It is an edited screenshot of Mymy from deel 5 with enlarged eyes and a pacifier on her mouth. It originated from a thread on zarty asking "What would ongezellig look like if it was made in Ohio instead of dutcherlands?", where someone made a weird edit of the characters faces, and someone suggested that a pacifier placed on this edited mymy's mouth would look hilarious. in retrospect, the result did indeed look quite humorous, but this resulted in a whole new wave of shitposting unique to soyzellig. Many users have made countless edits and drawings of ongezellig characters with big eyes and a pacifier, which evolved into actual baby versions of the ongezellig girls. A zaryan even commissioned a real life plushie of Agugu. The popularity of this meme resulted in some speculating that Agugu is a "mindvirus" that infects people's minds to obsess over her and keep spreading the gugu to everyone. A rare use of agugu is aguguquoting newfags, i.e. calling them babies for being new.

- **Peeb**

Peeb is a forced discord variant of zellig girls as tiny finger-shaped figures with big eyes. It is coal because it originated from discord.

- **Project ROY**

Project ROY was a group project led by some xitter artists aimed to make Ongezellig comics mimicking Massa's style. It was discontinued very quickly as xitter artists are lazy and unreliable.

- **Mymy appears on Nick Fuentes' stream**

on November 25th, 2024, Nick Fuentes the famous ZOG-approved far-right white supremacist glowie streamer saw a post about Mymy while scrolling through twitter on his stream. The post showed Mymy asking Chud out for a date. To which Fuentes commented "That's gay." projecting his own homosexuality.

- **Mymy appears on TV**

on October 12th 2024, Mymy appeared on American television when someone in the crowd held up a poster containing Mymy while the reporter was talking about a sports match. It was very gemmy because Mymy was shown right next to the reporter and he even looked back and pointed to it.

<https://soyzellig.party/zellig/res/42899.html>

- **left 4 dead mod and models**

A zaryan on steam commissioned 3D models of Mymy, Maya, Coco and Vera and made them into a mod as playable characters in Left 4 Dead 2. It is the gemmiest 'zellig mod on steam community workshop.

- **/v/ game**

a Zaryan made a gemmy flash game that shows us what would happen if Mymy's gun was actually real in deel 2. In the game you play as Mymy, starting with shooting Vera and the goal is to kill everyone in the school before the timer runs out and enact total schoolocaust. It can be found on the /v/ board on the zarty.

Tier 3 (completed may need revisions) [Feraljak mymy]

- **Zigle Zogle**

Zigle Zogle was an animated parody of Ongezellig by Zoot. It was planned to be an animation about Chud meeting with the 'zelligs and making a plan to slay Soot. Due to circumstances, it is now being remade as a comic with original characters.

- **Ongezellig - Deel 7**

There is another deel after deel 6. In deel 7, Mymy is seen at a table about to enjoy a stroopwaffel. Rapeson suddenly fades in from the darkness and smashes Mymy's face into the plate, ACKing her and leaving her to die.

- **Necrobumping**

Necrobumping is the practice of replying to threads which have already run their course and haven't had a reply in a long time to bring them back to page one.

Necrobumping is actually Zaryan culture, being most prevalent on the Sharty. People used to necrobump 'zellig threads on /soy/ and /qa/ by replying "zelligbumo", "bumozellig" whenever they were about to die out.

- **Niggerwiggle**

Niggerwiggle is a word used to describe Mymy's red bow thing or whatever that clothing item its called I don't leave my house except for school. It came from a cospasta about a 'teen's love for Mymy and wanting to have aryan children with her.

- **Soymy, soygem.party**

Soygem.party is a splinter of the sharty, with it focusing on Not A Soyjak content while having IAS influence. One day in a thread, an artist was asked to draw baby mymy. The image itself is a mymy with big eyes. binky and wiggly arms. The image was found by another person, which made several edits and spamquoted other users with them. Multiple people joined in to make edits, sementing Soymy as a glistening gemerald. The variant's name was Mymy, but people started calling it Soymy later on.

- **/co/**

/co/ is the Comics & Cartoons board on 4cuck. almost all it's users are gooners. When ongezellig first started gaining popularity, gooners in /co/ showed interest to 'zellig as well. There were some zellig threads there with hundreds of replies. A number of gooner zellig art originated from there. Nowadays zellig is not as popular on /co/ as it used to be.

- **New Japsterdam Takeover**

On September 8th in a /co/ thread, someone had an idea to advertise Ongezellig on the Times Square Billboard. After much planning and failed attempts, to the celebration of everyone it finally happened on September 16th. Hundreds of muttmericans got to see the 'zelligs, and the operation was a success

- **Ongezellig Reanimated Collab**

On january 19th, a thread appeared on /zellig/ proposing an idea of a reanimation collab. This snowballed into multiple Zaryans contributing towards the reanimation of Deel 6. This didn't go exactly as planned, as some people went dead silent at some point having to be replaced. Most of the 2d animations were actually done in a couple months, but Blender users took very long to finish their parts.

On september 24th, more than 9 months after the original thread, the reanimation collab of Deel 6 was finished and put on the zarty and 'tube, marking it as the most glistening, shiniest, gleaming tanzanites that saved the zarty. It is currently shown on the homepage on the zarty. One weird phenomenon is that Evilson is present in most scenes.

- **zelligbooru.glowie.zip**

zelligbooru.glowie.zip is the current booru of the zarty. not much is known about who created it. albeit the name suggests it might be a glowie. it is actually not the first zarty booru, there was an earlier one that got shut down due to the owner disappearing.

- **zooru namefags**

namefagging on soy boorus has evolved into a culture of it's own. this is most clearly seen in soybooru where the most obsessed of 'teens reside, where they bait eachother non stop all day every day and there is always a never ending flamewar. some zaryans mimicked this culture on the zelligbooru, namefagging and doing the usual baiting. although it is not at the level of soybooru, it is still funny. the most infamous namefag on the zooru is an user with the nickname "agugu", who does a bunch of baiting including racebaiting and pedobaiting. other notable namefags there are untermenschky, mario, entiral, BWCSuprematist

- **Copypastas**

There are a number of zellig copypastas which originate from different places such as 4cuck, sharty and zarty. You can find them on the copypasta page on the zelligwiki. the content of these range from zelligified versions of popular copypastas, shitposts and nsfw ones like explaining how rapeable each zellig girl is.

- **Reels immigrants**

circa late 2024, ongezellig started becoming very popular on instagram, mainly due to a page called savejapsterdam that posted zelligified versions of aryan classics. some zaryans noticed this popularity and made their own instagram pages to spread the word of zellig on instagram. this caused some instagram reels users to start using the zarty. they usually don't understand much about imageboards, and type in a condescending manner. this group is called the reels immigrants.

- **Room decorated with mymy**

there was an a10 Aryan zaryan who had an exceptional infatuation with mymy. he had a mymy room decorated all over with mymy art, framed pictures of mymy, mymy posters on the wall. he was considered the rightful owner of the title "mymyfag". but this zaryan got over his mymy obsession near the end of 2024, showing a video of him removing all of the mymy memorabilia out of his room.

- **Yosack Jaki**

Yosack Jaki is a zellig drawfag that started out by making mspaint drawings of mymy doing chuddy things. he displayed glowbait behavior like revering saint brenton tarrant on twitter. he later developed an obsession with mymy, drawing mymy X chud art, drawing mymy as his wife etc. it was later found out that he was an avid discord user and made naked mymy pictures to goon with his discord friends. he was ridiculed on zarty and said that he would leave zarty and zellig forever to make keyed soyjaks with his bros on sharty or something. albeit he still makes naked mymy drawings thoughbeit doe.

- **DFC**

DFC is an oldfag 4cuck pedo term that means "delicious flat chest". it is sometimes used by gooner pedos referring to Mymy as she is a flat chested girl. This term is often associated with Yosack Jaki because he seems to have a thing for Mymy's flat chest.

- **Mayo & Curry**

Mayo & Curry were characters made by massa. They were used in some of Massa's earlier comics and animations before ongezellig. What is interesting about them is that it is obvious that these characters were the inspiration for Maya and Coco.

draft 2

Mayo and Curry was a comic which had pages posted periodically on a site called Stripster It's known as the predecessor of Ongezellig, as the similarities and designs of the characters can be compared. Curry is the porn addicted rude bitch, while Mayo is the ditzy dumb bitch. In the comic, they constantly crack jokes about food and sex and constantly break the 4th wall.

- **Cancelled VN**

on October 14th 2024 a Zaryan made a thread saying that he had been working on an Ongezellig visual novel and he needed people to help with it. He then supposedly started recruiting people on discord, but nothing ever came out of it because nothing good ever comes out of discord.

- **'ZELLIG SOVLS**

'zellig sovls is a spine tingling A24 slowburn aryan kino souls-like Ongezellig game made by a zaryan on roblox. it is one of the gems that saved the zarty. in the game there are soyjak enemies, ongezellig themed weapons, and ongezellig characters show up as bosses. Maya is the easiest boss, Coco is harder and Mymy is the most difficult boss that only keyed Zaryans can beat. The game also has some interesting easter eggs in it.

- **/brabant/ and it's userbase**

/brabant/ is the zarty equivalent of /int/-international board on other imageboards. It is a board that shows your country's flag when you post. There is a vibrant

community there, and it has some popular users. The notable ones are the belarussian, the russians, the shitalian, the brapzilian and the sandniger arab.

- **GussyWussy**

Gussy is a 40 year old discord user giga-mega-omega pedophile drawfag that made many ongezellig drawings. he is known for making porn of lisa simpson in the past. he is literally the stereotypical discord groomer pedo. he displays creepy behavior like larping as a little girl while typing. what's notable about him is that he used to be a popular user in Massadonië and they defended him there.

- **Saberspark**

Saberspark is a furry JewTuber with a fanbase of 2 million trannies. He is an essay youtuber, so he reads informations from a wiki that others have spent countless of hours on just to make a quick shekel. He mostly reviews "obscure" cartoons and occasionally reacts on stream to paid requests. The idea of making Saberspark react to Ongezellig was brought up on September 10th 2023 by a Zaryan, talking about how to make Ongezellig more popular. On October 1st, 2024, Saberspark uploaded a video about the highlights of a stream where he reacted to Ongezellig. A Zaryan was quick to make a thread about the happening which prompted others to flock to his comment section, overwhelming it with gemmy posts, with most condemning him for "directly causing an influx of trannies to the community". Said comments almost certainly scared Saberspark into deleting the entire video the following day. Saberspark did not officially comment on the presence of Zaryans, however a lot of anti-zarty faggots showed incredible levels of seethe in the comment section.

- **Original Deel 1**

the original deel 1 is an unlisted version of the first deel that had poorer quality. The audio recordings were much worse, and some parts of the animation were a bit different. Massa later changed this deel and combined it with deel 2.

draft 2

On july 20th, 2018, Massa uploaded the first part of Ongezellig to youtube. However it was different from the Deel 1+2 video we know which was uploaded later. Deel 1 at first had worse microphone quality, a different credits scene, some parts of the animation were different and the title was later renamed to **"WHAT ARE YOU STILL DOING HERE WATCH THE NEW VERSION"**

- **ZPVA**

ZPVA (zellig party video archive) is an archive youtube channel inspired by SPVA (soyjak party video archive). He posts gemmy videos originating from the zarty and sometimes OC.

draft 2

ZPVA, or ligpartyarchive is a youtube channel dedicated to reposting and making soyzellig content. The channel has gotten several strikes from the kikes at youtube for not being wholesome 100. It's a sort of spiritual successor that is more involved in the Zarty of another channel which is a deeper entry.

- **Zuz**

Zuz, also known as Zuzzy Zuz or Zuznetsov, was an admin of soyzellig.party and manager of zartyappeals. He was one of the original 4 mods/admins.

He also acted as the nuadmin around late July due to Zoot's disinterest towards the website at the time. As of October 2024 he probably still acted as a pseudo-admin, essentially being Zoot #2.

His name is a compound of Kuz and the letter Z for Zellig, probably inspired from Zoot's name.

He used to be active in a few 'cords, but eventually quit out of spite for 'cord trannies and drama.

Zuz retired from being an Admin, presumably on October 27th 2024, as stated by Zoot due to him having long lost interest in Ongezellig.

- **Zoll**

zolly zoll o algo asi o qualcosa of zoiets or somethingissimo

- **the 'jeet**

the 'jeet is an indian banchod bastard that swore to make ongezellig popular in india. everyone told him that this is a bad idea but he still tries to do it out of spite. he makes some brimmy content on youtube. if you see him do not give him any attention or he goes apeshit. zellig bery good saar

- **Grim**

Grim Mymy, or Grim, is the unofficial name for an artist on /co/ who has gained a lot of notoriety due to his prolificacy and somewhat crude, instantly recognizable style. In the Ongezellig fandom he's mostly known for his Ongezellig fan art, which is often more shocking than anything else other artists have mustered up. Grim has posted on the Zarty on at least one occasion to show gratitude towards Zaryans' appreciation of his artwork. He posted under the name "the guy who drew these" and stated that he doesn't have a name for himself. On December 3rd, 2023, PinoyGOD created a thread dedicated to collecting Grim's art. The thread was one of the most prominent on /zellig/, but was controversial due to Grim often depicting peccant sexual scenarios, including Mymy sexually assaulting Mats (a character conceived by Cam), Maya preying on and having sex with a child, Studio Massa's channel logo having intercourse with Mymy's beheaded corpse, and various depictions of the girls masturbating. Despite the taboo nature of his drawings, the thread managed to stay up for over five months, until one day, when Zaryans

believed Grim went too far. On April 16th, 2024, Grim posted sexual art of Maya's voice actor, Robin Barten, on /co/. The three drawings depicted Robin and Maya engaging in mutual masturbation, passionately kissing, and having sex in the scissoring position. This was the straw that broke the camel's back and a Zaryan made an entire thread complaining about it on /q/ and the thread got locked and moved to /chive/ the following day. Zaryans criticized the mods' decision to lock the thread, but Zoot defended the choice, stating that the thread stretched the rules, had become too much of a nuisance, and that its original purpose had been fulfilled long ago anyway.

- **Bruhmeister993**

Bruhmeister is a prominent figure in the 'zellig community. he used to be (or still is) a mod on zarty aswell. he uses Tomoko for avatarfagging. some zaryans falseflagged as him because they are obsessed o algo. this caused him to get doxxed by kiwicucks or something.

- **Kane**

Kane or Kanesucks is an obsessed ESL shitskin xitter fnfpedo that made a zellig mod for FNF called funkgezellig. On xitter he said that he doesn't like soyzellig, which prompted some zaryans to attempt doxxing him for being an anti-zarty FNFpedo.

- **Kate**

Kate is an attention whore that claims to be an underaged black teenage girl that draws brimmy ongezellig art in which xhe self-inserts her nigger OC characters. Xhe is obsessed with zarty for some reason. Due to how unlikely it sounds that an actual black nigger teenage girl would find and use a site like soyzellig, some theorize that "Kate" is actually a 31 year old man who uses childish art style and mannerisms to attract children to groom them.

- **Zarty was going to shutdown on August 2024**

It's a bit self explanatory. Soyzellig's uptime is dependent on Zoot's yearly contract which he pays for. The Zarty was nearing it's end near August and combined with Zoot's disinterest Zaryans were fearing the site's end, but in the end the servers got paid for and the zarty lives another year.

(eslcheck this one please)

Tier 4 (complete may need revisions) ['plier mymy]

- **/zate/ /raid/ /agugu/ /nsfw/ /co/ /raid/ /ssb/ /r9k/ I think it should all be grouped into 1 entry**

There are many boards on the Zarty, some more well known than others, which no longer exist for one reason or another.

- /zate/ used to be a containment board to move anything thats coaly or brimmy to it. It was inspired by the /nate/ board on Sharty. It immediately started being used by racebaiters and became the racebaiting board. The main topic of discussion was whether Coco is built for BBC or BIC. It became so popular that the pph on /zate/ was higher than /zellig/. It was later deleted because Zoot thought it was too much.
- /raid/ was a board for organizing raids. It was generally unsuccessful because Zaryans can't raid. It was deleted after August 2024 alongside /co/.
- /co/ was used for discussing cartoons and anything alike. It was later changed into /chud/.
- /ssb/ was a board no one cared about, being a test board for jannies.
- /r9k/ was a board for truecel Zaryans but it was deleted out of spite.
- /nsfw/ was an April fools joke by zoot. some fakezaryan gooners always requested this board, zoot made it as a joke and then banned everyone that posted there.
- /agugu/ was a short lived board dedicated to posting agugu. no one knows why it was made and then removed one day later.
- /test/ is a hidden board on the zarty that is used for testing stuff. what are they testing there doe. they are testing whether their VPN works or not or something. they are testing MOSSAD datamining techniques

- **juicebox placement**

Some people noticed that at the end of Deel 6, Mymy's feet are being covered up by a carton of stroopwafelsap on the floor. This was a deliberate choice by Massa to troll the hecking gooners. There exists edits of this frame with the juicebox removed showing Mymy's feet.

- **Big eye zelligs**

This was a trend which involved editing still frames of the show to make everyone have big dilated eyes. It is a very gemmy and funny trend, which later evolved into Agugu and Peeb.

- **The janny team uses a 'cord**

Self explanatory, there's a screenshot in the mod panel with a discord invite.

- **dutchlarper**

There is 1 person which larps as dutch constantly seething about zaryans and zellig while at the same time goonposting. He's been doing this for years, most likely due to the show being cancelled and then turning into an obsessed complaining mad

oldfaggot dickriding Foenkie, seeing Massa as a perfect person and blaming everyone non-dutch for ruining the show and its fanbase.

- **Demoralizercord**

Every few weeks some demoralizer comes to the Zarty and posts a thread about how ongezellig is dead or why we should give up. these are NOT real concerned zaryans. they come from demoralizercord. we must stir fry demoralizers in a wok.

- **Baraag niggerpedo**

One day, a zaryan (((randomly))) out of nowhere for no reason ""accidentally"" discovered an account on the gooner pedophile site baraag. The account was a literal nigger commissioning other artists to make porn of his self insert "Yami Kuru" having sex with underage characters. This involved Ongezellig, with him going out of his way to have an entire comic made about him grooming and having sex with Maya. Zaryans eventually scared him and got him to delete everything 'zellig related, but it only worked for a while since he eventually commissioned 'zellig goonerals again. Don't ask me how I know this, because you just can't okay? (needs a bit more info methinks)

- **'p spam**

there is a bot that periodically spams 'p and 'p links on every vichan board, soyzellig is no exception. no one knows who is doing this or why. the zarty staff has taken precautions to auto-ban this bot when it arrives, but sometimes it can slip away, it usually gets deleted within minutes. the majority of zarty's ban page consists of this bot.

- **all cosplayers are men**

due to how many ongezellig cosplayers turned out to be men in the past, every new cosplayer is looked at with suspicion. it is the law that every cosplayer is male until proven otherwise. Especially maya cosplayers are almost always trannies that put striped socks , hoodie and a wig.

- **zelligparty.soy**

Zelligparty.soy (also known as Zelty) is a hidden imageboard created in late August of 2024 as a Zarty splinter in reaction to New Zarty Order. The users call themselves "Zhuds", but are commonly referred to as Zeltycucks. Zelty is best known and hated for their controversial doxing culture. As opposed to Soyzellig.party NSFW and gore is allowed and even encouraged. So it is like the jarty of zarty. The site is owned by namefag called Koos as well as literal who Hoot, who has some relations to a known doxxer called Simul. Jannies of the Zelty are hired from Hoot's reddit friend group. You need special permission from Zeltycord to access the site.

- **Koos (Admin)**

Koos is an ESL jartycuck pedo gooner and the creator of zelligparty.soy. He claims to be a freedom fighter waging a war against "moralcucks" but all he does is enable pedo gooners to goon to ongezellig. His idea was basically making "zarty but with NSFW allowed", which was a terrible idea that should have never been realized.

- **The New Zarty Order**

The NZO was a controversial set of reforms enacted by Zoot on August 26 2024 aimed to distance soyzellig from soy and zellig even doe it's literally in the name. Seeing no chance of Ongezellig being continued by Massa Zoot got demoralized, believing that Zarty culture without new Massa content will slowly diminish. After repurchasing Soyzellig.party domain on the August 2024 Zoot tries to turn Zarty into imageboard focused on creation of OC, which caused mixed and negative reactions from zaryan userbase.

First plan of reform consisted of merging together /zellig/ and /qa/, adding a few snca boards and removal of /raid/ and /co/. After heavy backlash from most of the community, on the 1st Septembred 2024 only two last points were enacted, with new board /oc/ added.

After all of this though Zoot still claims that Zarty no longer zellig based imageboard, still trying to move away community from Ongezellig, claiming that Zellig culture is only transitional to the new future OC culture.

- **The original original booru (gooner)**

The earliest ongezellig booru is called ongezellig.booru and has no relation to soyzellig at all. It was opened by Foenkie's friends and it is full of gooner pedo brimstone from niggerhell. 90 percent of all content there is porn. And they don't allow any new users, or any new posts either, the last post was a year ago. it sits as an unused gooner den, hopefully it shuts down one day.

- **/rust/ VS big_cheeks_with_tongue_out**

There was a poster which made edits of ongezellig frames with the characters' cheeks puffed up with their tongue out. Later on, another used challenged these edits with instead editing the same frames with a giant rusty nail impaling the characters' head. Another phenomenon related to this is Agugu edits. whenever there is a frame from ongezellig is posted on the zarty, there is about a 20% chance that it will be edited to be agugufied with a binky and large eyes.

- **Anonymouse zarty ""hack""**

After a dispute with Zoot over making the ongoing animation collab be NAZ, Zoot staged an event in which the pet nigger hacked the site. Their demands were to ban all Ongezellig content. This backfired, because of a thread in which many 'kaki IAZ zems were made.

- **Ongezeltly**

Ongezelt is a margestone 1 episode film in which Maya is a nigger tranny 'corder, causing Mymy to bully xer.

(needs more info)

- **Sam Tollenaar (kiwifarms thread)**

Sam Tollenaar is the real name of Studio Massa. some obsessed kiwicucks found tons of information about him, which can be read on the ongezellig thread on kiwifarms. Notable things from that thread are that he used to make furry art, was a former brony, and had a media review channel in which he reviewed sonic porn.

- **coswork16**

coswork16, also known as coswork freak or cockvore freak, is a fetishistic autistic kid who was heavily groomed on deviantart. He has fantasies with ongezellig girls, including giantess zelligs, futa zelligs, zellig feet and so on. He is also obsessed with the idea of Mymy being a trans girl. His avatar is a blue circle with glasses. Many zaryans copy his posting style so it's hard to know if the autistic fetish posts are made by actual coswork or not.

- **Vera is jewish**

Some zaryans think that Vera is jewish for some reason. the reasoning seemingly is just that "She looks and acts jewish". There is no peer-reviewed study or a snopes fact check about this though.

- **Frogniggers**

Frogposters, also known as frogniggers or frogkikes are a group of posters that post pepe the frog. They originated from /qa/, and are present on the soysphere. since the beginning of zarty, frogposters aggressively spammed and raided the site. as a punishment, posting frogs is strictly forbidden on zarty to this day.

- **Zelligcraft**

Zelligcraft was a zarty minecraft server that stayed open for a couple months during the summer of 2024. it was also an IP grabber and everyone who played there got doxxed raped and killed.

- **the purpose of /test/**

the real purpose of the /test/ board on zarty was testing out the new datamining software that was installed after August 2024. They don't want you to know this doe.

- **Mymy manifests as a demon in zaryan's dream**

A zaryan posted his experience in a dream he had one night. He had lucid dreams in which he spent time with the tnd girls. In one of the dreams, Mymy takes the zaryan into her room to tell him something. Mymy asks Zaryan to kill himself in real life in order for him to transport into the Ongezellig world, so they could live together forever. Mymy is of course Satan himself trying to convince Zaryan to ACK.

- **Mymy abuse**

Mymy abuse started out with seemingly one poster describing his desire of hurting, torturing and abusing mymy. this poster was apparently not doing this out of hatred, but had a sick obsession with mymy and had sadistic fantasies about the pleasures of hurting her, providing details about how he would abuse her and how fun it would be to torture her. This later evolved into some drawfags drawing images of mymy getting abused. one certain drawfag used the "cursed zelligs" thread to make a set of mymy abuse drawings, showing mymy in dire situations, filled with cryptic runes and symbols that resemble satanic sigils. the filenames of these drawings were "mississippi" followed by a string of numbers, seemingly a countdown that decreased with each new drawing,

which abruptly stopped. there are theories surrounding this poster, which will be talked about in a further entry.

- **Aguguland.online**

Aguguland.online, also known as Agurthy, was an imageboard created on October 7th, 2024 dedicated to posting agugu. it had only one board called /agugu/. it was supposed to be open for only one month, but the owner forgot to disable auto-pay for the servers so it stayed open for a couple months until it shut down on December 15th, 2024.

- **ALVA**

Agugu Land Video Archive is a youtube channel that posts agugu videos. the videos found on the channel are pure autistic shiny margeralls.

- **NOOK**

Nook used to be a Zarty mod which ran the Zellig Video Archive channel, which posted zems from the sharty. The channel was inactive for a while, but one day Nook was found out to be a roblox pedo groomer nigger faggot nigger and he left the janny team. Before then, Nook was only known as the sharty /raid/ guy, constantly making gemmy seetheralls by playing loud sound effects of "Nigger" and showing DNB to livestreamers.

draft 2

NÖÖK, also known as rivenook, is a pedophile and was one of the original mods of soyzellig.party, along with being the manager of the abandoned Youtube Channel ZelligPartyArchive. He lives in the United Kingdom and for the majority of his time as a mod, he had only brief interactions with the community. it can be assumed that NÖÖK is a foodist that found his way to the Sharty's /raid/ board, and decided to use 'jaks and other aspects of sharty culture as something to crank his clitty to. Unfortunately it seems that he discovered Ongezellig shortly after and when the thread about the creation of the Zarty was posted, he saw this as a golden

opportunity to become a janny on the dutch tranime girl website (and probably to crank his dick more efficiently). He managed to conceal his real identity up until October 27th 2024, with the entire administration only knowing him as "the /raid/ guy who trolls around" and acting fairly normal while moderating on the Zarty, before the TRVTH was released. He also likes to post soylita, gender trap people and later blackmail them for money, show porn to minors, run 'cord psyops, goon to 'p, talk to BU5T and defend him (another known pedophile), feel sorry if pedophiles get killed, goon to soytan, goon to Ongezellig, talk like a faggot, ERP on Discord and a bunch of other depraved shit. he is a pedophile EPI faggot who runs Rosex prostitutes rings and condo games on Roblox from his little 'cord server, regularly did erotic roleplay sessions with minors, stated multiple times that he's fine with minors being exposed to pornographic content, stated multiple times that he also wants to "fuck children" and that he's pedopilled. The impact that this had on the Zarty was enormous, with many being demoralized by this unfortunate fact, since this means that the "zelligtranny pedophile" stereotype became true. Many Zaryans denounced the actions of Nook and were also feeling ambivalent towards continuing to be on the website, leading to an extreme uptick in doomerposting, and presumably leaving behind only the most hardcore of Zaryans. May this faggot called Nook choke on air, he will NOT be missed.

- **The janny team uses 'cord**

The jannycord is real. The janny team of zarty uses discord to communicate. this shouldn't be seen as much of a surprise as the janny team of 4cuck and sharty have their 'cord too. no one uses IRC in the current year. The jannies could be using this 'cord to gossip about the zarty posters doe. No one other than the jannies really know what's going inside there.

Tier 5 (4cuck tier)

- **"Schoppenboer" translates to "Jack of Spades"**

The surname of the zellig girls, "Schoppenboer", when translated to English, means "jack of spades". The "spade" in their surname is used by racebaiters as definitive evidence that the girls are, in fact, all built for BBC, as it sounds like the BNWO symbol "queen of spades". Schoppenboer appears to not be a real surname, but one Massa came up with.

- **Jannies leak post history**

Some jannies on the zarty are proven to be stalking people's post histories, and they have no respect for people's anonymity, and they have even mentioned people's post

histories publicly for everyone to see in the past. One incident was when a zarty mod edited a Zaryan's post with adding red bold text at the end of his post saying "Bro's entire post history is Mymy abuse aw hell nah". This behavior by jannies, combined with the fact that there are infinite pages on zarty so the old posts never go away, makes some zaryans question the security on the zarty. It is advised to not use the same IP for too long as mods do in fact stalk you and gossip about you on the jannycord, and may one day use it against you.

- **50 board plan /zellig/**

After August 2024 when Zoot introduced the New Zarty Order, zoot had plans to introduce a bunch of SNCA boards. This was likened to the 50 board plan on Sharty. Thankfully this didn't happen and instead some boards were merged together.

draft 2

During 2023, froot's reign, there was an event in which frqqt made 50 boards, one of them was /zellig/. It was a gemmy board (screenshots and more info needed). The twist was there were votes which put up the boards against each other, /zellig/ made it to the finals but lost to /health/. (fact check this one please

- **agugu obby**

Agugu obby is a platformer roblox game made by a zaryan in which you play as agugu. Every texture in the game is Agugu.png and it's a very brain rotting experience. Approach this game with caution as you might catch the agugu mindvirus if exposed to it for too long.

- **original zarty booru / XOOT**

Before zelligbooru.glowie.zip there was an older zarty booru called zelligbooru.party. it was made by XOOT, who was one of the original mods of soyzellig.party, alongside Zoot, Zuz, and NÖOK. Unfortunately, XOOT later completely disappeared off of the Internet, rendering the booru unusable, and it shut down. XOOT might have actually died in real life and we may never know.

Bonus fact: a picture of Coco with a pacifier was uploaded to this booru a year before Agugu was invented, which can be interpreted as coco being the original agugu.

- **June 24th group suicide event**

On March 24th of 2024, a zaryan began announcing that there will be a "soyzellig group suicide event" on June 24th. The following months, the phrase "june 24th soyzellig group suicide event" was posted multiple times. The event was originally planned to be on the 3rd floor of the Hilton hotel near the Frankfurt airport, but this idea was later dropped. On June 24th, 2024, a Zaryan made a soyzellig.party thread with the message "It's June 24th. Let's do this, friends. It's been nice knowing you." and a link to a talky.io chat room. His webcam was enabled and showed a paper with

the text "THE Best OF ME" written on it with printed out photos of Mymy, Maya, and Coco surrounding it. A black object, presumably a gun, was visible on the top right corner of the frame. At one point during the stream, he briefly showed his hand, which was covered with a latex glove. News of the event spread to soygem.party, which caused an unanticipated increase in users. The chat room was dysfunctional due to everyone having administrative rights, meaning anyone had the ability to kick other users, which forced the OP to end the stream prematurely. After the failed talky.io stream, the suicidal Zaryan posted threads on soyjak.party and soygem.party announcing that he'd be streaming on the platform Zoom and provided a link for those who wanted to join the video call. After a few minutes, OP moved the black object out of sight and the lights went out, the stream then finally ended.

- **Kuz attempts to buy Ongezellig**

Yuri Kuznetsov, a former admin of the Sharty and the owner of the Kolyma network, was one of the sharty admins that liked 'zellig. He once posted a poll on his telegram channel asking if he should try "buying Ongezellig". The majority of the votes said Yes. He actually reached out to Massa with an email written by a translator offering to buy Ongezellig, Kuz claimed that it didn't work out because the translator wasn't incredibly fluent in Dutch. Foenkie confirmed that it did happen and said the email was "dumb" and "obviously sounded like a troll." Massa never responded to the mail as far as we know.

- **Zarty's old favicon**

Zarty's current favicon is a smiling Coco with an embedded transparent swastika over it. The first favicon was a Mspaint edit over Mymy's face with raised eyebrows, and the second one was an embarrassed Maya.

- **the original 'zellig spammer**

The original 'zellig spammer was a legendary person that spammed ongezellig on 4cuck's /qa/. he is the person that started this whole trend. He is directly responsible for the popularity of ongezellig today. After his ongezellig posts, others followed him and also started posting about it. If it wasn't for him, probably not many people would have heard about ongezellig, and the fate of ongezellig would have been very different.

- **FNF IS BETTER THAN ZELLING**

"FNF IS BETTER THAN ZELLING", also known in ESL as "FNF IS ARE GOODER THEN ZELLING" was a phrase used by anti-zellig posters on zarty. Hating on ongezellig is a trend on the sharty because they are obsessed.

- **Rogue mod**

This is related to the "Jannies leak post history" entry. There is a prophecy that says that one of the mods in the zarty mod team will one day go rogue and reveal

everyone's information. When zoot first created soyzellig, he appointed 4 moderators from a group of people he trusted, and gave them full access to everyone's IP's and post histories. This is an unusual move, as imageboard admins usually do not give this many people access to this much information. We later learned that Zoot made a mistake with the group of people he trusted, as NOOK, one of the original mods was found out to be a pedophile who wasn't even a zellig fan before he met Zoot. We also know that mods do indeed stalk the post histories of zaryans and do not care much about anonymity on the platform. The theory is that, among the mod team, there is a mod that abuses his access to this information, he meticulously notes down and archives everything, every post, every IP, and will one day release all this information to expose everyone and this will be the biggest scandal in soysphere history. Zarty having infinite pages means that old posts never go away, and even if you change your IP address or use a VPN, they are all still tied to the same useragent data, so all the posts you've ever made on zarty could one day tied back to you.

- **total zaryan victory GET**

the 30000th GET on sharty's /qa/ was won by a Zaryan with an image of mymy with the caption "ZELLIG WIN". it was a huge win for zaryans and caused immense seethe on sharty. it had tons of replies from butthurt nusoicucks.

- **R_Terra password leak**

Roos terra used to post on the zarty. He had several coco threads and he posted coco every day. One day, he posted a screenshot of zarty, but he forgot to blur out his post deletion password, which resulted in zaryans deleting all his posts, and then he never came back again. He thought he was being hacked and all his accounts were in danger, which was funny.

- **Lorenzo**

Lorenzo Yario is an obsessed yurifag gooner that ships ongezellig girls in lesbian relationships. He currently holds the "warsaw's biggest rapist" award.

- **Sharty ongezelligfan falseflag**

ongezellig fan or zlxfan, was a pedophile xitter account that posted AI generated pornographic images of ongezellig girls as children. Obsessed anti-zelligers falseflagged on sharty saying that he was a zaryan and all zaryans are like him, in order to get people to hate zaryans. This was part of a bigger event called the zelliggate, where a number of similar xitter accounts were found, making AI 'P of zellig girls. zelligfan was later doxed, which scared him away, and all these accounts were then banned from twitter.

- **rapeson secret in 'ZELLIG SOVLS**

in the roblox game 'ZELLIG SOVLS, it is rumored that there is a secret way to get into Rapeson's lair, which is a dark room with tools of torture, and zellig girls are tied

up or slaughtered. Snopes says that this fact is debatable.

- **Mysterious thread deletions**

sometimes people hallucinate seeing threads mysteriously disappearing on zarty. this doesn't actually happen, you just need to take your meds. you will not question this. these threads probably never existed in the first place. there is nothing to see here, zoyim.

- **sharty /qa/ AI thread**

There used to be a huge ongezellig AI thread on sharty's /qa/. it contained many, many AI generated art and voice covers. It is the thread where many classic zemerlads like mymy singing Gem Cobbity originated from. It is the thread that where zellig AI models were first shared and it popularized making AI art and covers with zellig girls voices. It was truly one of the shiniest Zem mines ever.

- **Deel X (DO NOT RESEARCH)**

[REDACTED]

- **Pancookie**

Pancookie was a Twitter gooner who created fetish porn of the Ongezellig cast. This made him the target of a group of Discord users by the names of Cowboy, Simul, and Larry, who doxed him in the form of a video edit. The tacky nature of the dox angered many Zaryans, with several of them petitioning Zoot to ban doxxing. Zoot eventually updated the rules to make unauthorized doxxing a bannable offense, authorization will only be given by moderators if they deem a person to be worthy of doxxing, such as the baraag nigger pedo mentioned before.

- **thequestion**

Thequestion was a 'corder with a scat fetish which was doing a heavy investigation on Foenkie and his actions. He planned to make a video, including a comic called Ongepunisher, in which Mymy kills Foenkie, being based on The Punisher or something. If he contacted you to make art for his comic or if you saw him in public, you'd notice he gave off an uncomfortable feel. In the end, he slowly drifted off from his personality, 'cord, 'zellig and all his plans as a whole.

- **original booru (zellig)**

There used to be a zarty booru in 2023 called zelligbooru.party. The website is now down, as the owner moved on. It had around 100 posts before ACKing and being forgotten.

Tier 6 (schizo mymy tier)
